MR3 Network Bi-Monthly Videoconference Minutes
Wednesday, July 20, 2016

On the call:
M. Bamman; M. Boninger; A. Cernich; C. Crowe; G. Cutter; L. Jakeman; S. Kautz; J. Ku; L. Miller; R. Nitkin; K. Ottenbacher; G. Peng; Simbex representatives

1. Scientific Presentations:
   a. Marcas Bamman: Overview of REACT Center Medical Rehabilitation Clinical Trials

2. Update on the promotion of the Network at the following meetings:
   a. NCMRR/REACT Workshop: The Future of Medical Rehabilitation Clinical Trials — September 29, 30, Bethesda, MD (NIH)—final tweaks being made to agenda; clinical trial
   b. Symposium on Regenerative Rehabilitation—October 14–16, Atlanta, GA
   c. ACRM 93rd annual conference, October 31–November 4, Chicago, IL
   d. Discussion on standing symposium at annual ACRM meeting—ongoing

3. MR3 Network Website—Update from Baylor College of Medicine Team
   a. Baylor has developed a beta-version of the site that should be available by the end of August. Initial section priorities are informed by REACT Center site utilization data, including News, Announcements, Funding, Education/Training, Consultations
   b. Inventories of current MR3 Network member sites are being developed. These inventories form the core content of the MR3 network website.
      i. The sizes of the inventories and diversity and differing maturity of assets has presented challenges when assessing how to present the assets in a standardized way that would be considered most valuable to site visitors.
      ii. Candidate classes of assets continue to evolve.
      iii. The key information interviews will provide additional insight onto organization and information priorities.
   c. Communication contacts with network members
      i. Baylor has joined all MR3 Network center listservs
      ii. Baylor contacted all Centers and corresponded with all but one. All corresponding Centers have affirmed that their listserv is the single best way to learn about their Center’s news; but are happy to correspond
about other items of possible interest. For the sole Center that has not replied, the recipient was unavailable.

d. Needs Analysis
   i. The protocol for the Key Informant interviews and the draft invitation letter were shared in the most recent UAB update meeting; Baylor is anticipating meeting attendees’ comments on both documents.
   ii. Interviewees include the 6 PIs, 2 Program Directors, and up to 6 candidates representing junior faculty identified during PI, PD Interviews
   iii. The IRB is being prepared and will be submitted once the final protocol has been approved.

   a. Premiere issue previews this week; issues to coincide with calls moving forward (Sept., November, January, March)
   b. Building listserv: We need your help

5. External Communication: Quarterly national e-newsletter, “Medical Rehabilitation Quarterly”—we need your latest scientific news
   a. Format: Brief, lay summaries of recent published work
   b. Email concepts to Christina Crowe, crowecm@uab.edu
   c. Building listserv (external audience): We need your help

6. Future calls:
   a. November 16: Scientific Presentations by Dr. Robert Motl and Dr. Fabrisia Ambrosio
   b. Need volunteers for the March call

Future Call Schedule (all calls taking place at 11am CST via GoToMeeting):
   Wed., Sept. 21, 2016
   Wed., Jan. 18, 2017
   Wed., March 15, 2017
